

## Naproxen Suppository Shortage

Product	Manufacturer	DIN
<b>Naproxen 500mg Supp</b>	PMS	0217237

PMS-naproxen 500mg suppositories are no longer available. Although not officially discontinued, they have been inactivated and there are no plans to manufacture this product in the near future.<sup>1</sup>

No other brands are available.<sup>2,3</sup>

Naproxen suppositories are primarily used when NSAIDs cannot be taken or tolerated orally or when their local effects are desired, for example, in postpartum pain and postoperatively.<sup>4,5</sup> They are also indicated for reducing incidence and severity of post-endoscopic retrograde cholangiopancreatography pancreatitis (ERCP).<sup>6</sup>

### Other NSAIDs available in rectal suppository form:<sup>2,3,7-9</sup>

Strength	Manufacturers	Recommended Dosage	Comments
<b>Indomethacin</b>			
<b>50 mg</b>	SDZ	Max daily dose: 100mg-200mg	Increased incidence of adverse effects e.g. headache, drowsiness, dizziness - particularly in geriatrics <sup>2,8</sup>
<b>100 mg</b>	SDZ	100mg max/dose <sup>2</sup>	
<b>Diclofenac</b>			
<b>50 mg</b>	PMS, SDZ, NVR (Voltaren®)	50-100mg OD	Risk of myocardial infarction and stroke may be higher than with naproxen. Most commonly associated with hepatic adverse drug reactions. <sup>2</sup>
<b>100 mg</b>	PMS, SDZ, NVR (Voltaren®)	Max daily dose: 100mg	

\*All preparations are on the Saskatchewan Drug Plan & Extended Benefits Branch<sup>8</sup> and Non-Insured Health Benefits<sup>9</sup> formularies.
