

Important Information about Paxlovid™ Expiry Dates

- The expiry date of this package of Paxlovid™ has been changed.
- The old date will be covered up and the new expiry date may be on a label or sticker, or written on the box and blister cards.
- Paxlovid™ is an important medication, and to make sure we have it available, Health Canada has approved extending the expiry date.
- Manufacturers are required to write an expiry date on all packages of medications. This guarantees that the medication will be effective until this date if it is stored in the original package under proper conditions.
- The Paxlovid™ given to you will still be effective and is safe for you to take.
- Paxlovid™ should be kept in the original package at room temperature.
