

Dear Wholesalers, Distributors, and Retailers,

Health Canada has granted a temporary exception for the importation of a limited quantity of Genexa US-labelled Kids' Pain & Fever, Acetaminophen Suspension for children.

This product does not have French labelling or French instructions with it. Hence, we have created special provisions as below:

1. A French tear-away pad containing all the label information has been created. **This pad must be kept beside the product on the shelves**, where it is visible to the consumers. Consumers can tear away a leaflet to carry with them when they pick up the product.
2. There is a QR code on this leaflet, which **consumers can scan and would lead them to a webpage** containing the same information so that it can be downloaded and readily available on their devices.
3. **Please print the next page and stick it to the shelves.** This will explain the process to the customers in case they are not able to get a copy of the French tear-away leaflet.

Health Canada also requires these special provisions to allow us to import this product. Hence, we request you kindly comply with these arrangements to address the shortage of children's acetaminophen products.

Regards,

Manufactured for:

Genexa Inc. Atlanta, GA 30318
1-855-GENEXA-1
genexa.com

Imported by:

Quality & Compliance Services Inc.
2000 Argentia Road, Plaza 2, Suite 220,
Mississauga, ON L5N 1V8
